ALP classic

ALP classic sets design and quality benchmarks with its superior engineering, optimum finishing and elegant case from solid aluminium. The highly effective reflectors ensure a homogeneously and pleasantly heated area. Both in professional and home use, it is the ideal source of warmth for all interior and sheltered outside areas. With its broad selection of models and its small geometry the ALP classic offers an almost unlimited range of uses in extremely compact dimensions. It can be delivered as single or as a combination of up to 9 elements.

Wattages: 1,000 W up to 2,000 W (so 18,000 W for 9 elements); **WxHxD:** 47.5 x 9.5 x 13.0 cm; **weight** 2,455 g; **colour:** silver (aluminium)

ALP elegance

Whether heat, light or both at the same time – **ALP elegance** offers innovative and optimum benefits with hardly any floor space. Individually adjustable, the ALP elegance is a totally new path for high-tech heating systems – on the balcony or terrace, in the conservatory or generally for restaurant use. Lighting elements are individually adjustable because of swivel joints.

Wattages: 1,000 W up to 2,000 W; **WxHxD:** 69 x 9.5 x 13.0 cm; **weight** 3,735 g; **colour:** silver (aluminium)

All systems are: VDE certified, dimmable

SLS professional

SLS professional - infrared systems with high grade stainless steel casing. SLS professional can either be supplied with special glass screen and rain protector or protector grid.

Wattages: 1,000 W up to 2,000 W;
colour: high-grade steel

Grid:

WxHxD: 42.3 x 22.3 x 15.7 cm; **weight:** 3,320 g;

Glass:

WxHxD: 49.0 x 29.0 x 22.0 cm; **weight:** 5,824 g
